- GitHub polishing, resume review, and deployment

🎯 Month-wise Learning Outcomes

🌟 Month 1 – Web Foundations

- Build responsive websites using HTML5 & CSS3.

- Gain confidence in JavaScript fundamentals.

- Create interactive web pages with forms and DOM.

- Deploy your **personal static portfolio site**.

✅ **Projects**:

- Form Validator

- Personal Portfolio (HTML/CSS/JS)

- Calculator App

🌟 Month 2 – React Developer Track

- Build modular, component-based UIs in **React**.

- Master routing, props, hooks, and form handling.

- Style applications using **TailwindCSS**.

- Collaborate with GitHub and deploy real projects.

✅ **Projects**:

- React + Tailwind Portfolio

- Weather App / Blog UI

🌟 Month 3 – Advanced Frontend Mastery

- Work with live APIs and handle async data.

- Add scroll animations and dynamic transitions.

- Develop full UIs with dashboards and protected routes.

- Learn SEO, best practices, and freelance skills.

✅ **Projects**:

- Capstone Project (Blog UI / Travel UI / Food App UI)

- Resume-ready deployed portfolio with multiple pages

🚀 Frontend Development Training

🎯 Target Audience

- Beginners looking to enter web development

- College students wanting practical skills

- Professionals switching to frontend careers

- Freelancers aiming to build responsive websites

💡 Why Choose Us?

- Project-based learning with real-world UI/UX

- Covers modern tech stack: HTML, CSS, JS, React, Tailwind

- Expert mentorship with live doubt-clearing sessions

- Portfolio-building focused, ideal for job seekers

- Resume, LinkedIn & GitHub optimization support

🛠️ Project Categories

- Personal Portfolio Website

- Business Landing Page

- E-commerce Product UI

- Blog Website with Dynamic Routing

- Dashboard with Responsive Charts

- UI Clone Projects (Netflix, Spotify, etc.)
